

**Press release**

Ginger Oil AB (publ)  
Stockholm, 2008-10-02

**Future listing and trading with Ginger Oil stock**

Ginger Oil is surprised over recent developments relating to the performance of the stock exchange, Nordic Growth Markets (NGM). The company is particularly concerned with the risks and limitation of its shareholders opportunity to trade and receive a fair value of their shares.

Ginger Oil perceives the order from Swedish Financial Supervisory Authority (FI) as a very serious alarm. Our preference and trust for the NGM as an institution has been damaged. Ginger Oil will monitor developments carefully and evaluate options with the objective to satisfy the needs of both shareholders and our company.

Ginger Oil Board of Directors is prepared to act and is seeking a well established solution that satisfies needs both of the company and its shareholders. It is particularly important to accomplish a solution that provides a reliable valuation and liquidity in the trading shares of our company. This issue has a high priority to be resolved.
